FORMULA 2 CORN COB DRY MEDIA

Thank you for using our Formula 2 Corn Cob Media. We're certain you'll find it to be an excellent cleaner and polisher, even on the dirtiest cases.

Inside this carton, you'll find one large and one small plastic bag. The large bag contains the ground corn cob dry media. The small plastic bag contains the polishing compound, a white non-toxic abrasive cleaner. By packing them separately you can choose to clean with just the corn cob media (handy for removing lube from resized cases), or add the polishing compound and clean and polish at the same time.

Remember, DO NOT tumble loaded ammunition!

To clean cases, pour the corn cob media into your case cleaner, add cases and turn on the unit. To clean and polish cases, add the contents of the bag of polishing compound to the corn cob media.
