## **FORMULA 1 WALNUT SHELL DRY MEDIA**

Thank you for using our Formula 1 Walnut Shell Dry Media. We're certain you'll find it to be an excellent cleaner and polisher, even on the dirtiest cases.

Inside this carton, you'll find one large and one small plastic bag. The large bag contains the walnut shells, ground to a 12/20 sieve size. The small plastic bag contains the polishing compound, a white non-toxic abrasive cleaner. By packing them separately you can choose to clean with just the walnut shells (handy for removing lube from resized cases), or add the polishing compound and clean and polish at the same time.

**Remember, DO NOT tumble loaded ammunition!**

To clean cases, pour the walnut shell media into your case cleaner, add cases and turn on the unit. To clean and polish cases, add the contents of the bag of polishing compound to the walnut shell media.
